PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with a strong foundation in backend systems, databases, and web application development. Experienced in building software solutions using Node.js, Django (Python), React, PHP, and MySQL through academic learning and structured tech training programs. Passionate about developing scalable, user-friendly applications and continuously improving technical and problem-solving skills.

EDUCATION

Present

Addis Ababa, Ethiopia

Bachelor of Science in Software Engineering

Addis Ababa Science and technology

Relevant Coursework:

- Data Structures and Algorithms
- Object-Oriented Programming (C++)
- Database Systems (MySQL)
- Computer Networks
- System Analysis and Design
- Internet Programming

Skills Gained:

- Software development lifecycle understanding
- Backend logic design and implementation
- Database design and SQL querying
- Problem-solving and system modeling

TECHNICAL SKILLS

Frontend

React, HTML, CSS, JavaScript
(Basic -> Intermediate)

Backend

Node.js, Django (Python), PHP
(Basic)

Databases

MySQL, SQL queries, relational
database design

Programming Languages

C++, Python, JavaScript, PHP

Tools

Git, GitHub, VS Code

Concepts

REST APIs, OOP, MVC
architecture, CRUD operations,
System Design basics

STRENGTHS

Core Strengths

- Strong problem-solving and analytical thinking
- Fast learner with ability to adapt to new frameworks (Node.js, React, Django)
- Strong attention to detail in coding and debugging
- Good understanding of backend systems and database logic

CAREER OBJECTIVE

Objective

To become a professional Full Stack Developer specializing in building scalable web applications using modern technologies such as Node.js, Django, React, and databases, while continuously growing technical expertise in real-world software development.

PROJECTS

Internship and Job Portal System (C++ & MySQL)

- Built a full-stack-style console application to connect students with internship and job opportunities
- Designed and implemented a MySQL database for managing users, job postings, and applications
- Applied OOP principles to structure system modules for scalability and maintainability
- Improved data organization and simplified job tracking process for users

Supermarket Inventory Management System

- Developed a C++ system to manage stock, sales, and inventory records efficiently
- Implemented file handling and structured data storage for real-world simulation
- Reduced manual tracking errors and improved inventory accuracy through automation logic
